

DHRUBA ARYAL

SOFTWARE DELIVERY | SOFTWARE QUALITY | CI/CD | API & DATABASE TESTING

Holly Springs, NC | (919) 297-8541 | dhrubaaryal.it@gmail.com | linkedin.com/in/dhruba-aryal | github.com/daryal89

PROFESSIONAL SUMMARY

Technology professional with experience across DevOps support and software testing, strengthened by recent hands-on projects in CI/CD, containerized cloud deployment, REST API testing, SQL/PostgreSQL validation, and automated quality gates. Combines software delivery and software quality through repeatable automation, deployment validation, technical evidence, backend verification, and controlled recovery workflows.

TECHNICAL SKILLS

Software Delivery: GitHub Actions, CI/CD, Git/GitHub, Docker, GHCR, Linux, Terraform/IaC, AWS, Microsoft Azure, Azure Container Apps, OIDC, smoke testing, rollback/recovery

Software Quality: Functional/regression/manual testing, REST API testing, Postman, Newman, SQL, PostgreSQL, database testing, defect reporting, RTM, JSON/JUnit reporting

SELECTED PROJECTS

Production CI/CD Deployment Portfolio | Independent Portfolio Project Aug 2026

- Built GitHub Actions CI/CD for a Dockerized REST API with GHCR publishing, immutable commit-SHA tags, OIDC-authenticated Azure Container Apps deployment, post-deployment smoke testing, BUILD_ID traceability, rollback, and verified recovery.
- Validated failure handling by introducing a controlled defect, detecting it through smoke testing, restoring a known-good image, remediating through a pull request, and verifying production recovery.

API, Database & CI Test Automation Portfolio | Independent Portfolio Project Jul-Aug 2026

- Created 25 manual/API test cases and an RTM; executed a 26-request Postman collection with 61 runtime assertions and documented 3 confirmed API defects.
- Executed 19 SQL validation/analysis queries, 13 automated database-summary checks, and 6 database-constraint negative tests; built a stable Newman/GitHub Actions quality gate with 45/45 assertions passing.

PROFESSIONAL EXPERIENCE

Senior Network Security DevOps Engineer | Northwestern Mutual Sep 2022-Apr 2023

Milwaukee, WI | Remote | Full-time

- Supported Linux/AWS environments using Git, Docker, Terraform, and basic shell scripting; assisted with deployment checks, configuration validation, troubleshooting, and repeatable procedures.

QA Test Engineer | ITORIX LLC Mar 2020-Sep 2020

Charlotte, NC | On-site | Contract | Client: Wells Fargo Bank

- Performed functional/regression testing and SQL-based backend validation; documented defects, retested fixes, and supported release validation.

Technical Test Lead - US | Infosys Apr 2019-Sep 2019

Raleigh, NC | On-site | Full-time | Client: Anthem - Short-Term Testing Assignment

- Executed test cases, validated backend data with SQL, documented discrepancies, and supported issue validation.

Automation Engineer | Matlen Silver Feb 2019-Apr 2019

Plano, TX | On-site | Contract | Client: Bank of America - Virtual Assistant Application Testing

- Performed manual functional validation, documented reproducible defects, retested changes, and communicated validation status.

EDUCATION & CREDENTIALS

Bachelor's Degree, Earth System Science and Environmental Engineering | The City College of New York (CCNY)

New York State Intern Engineer (EIT) Certificate | New York State Education Department
